The More You Do, the Better for You

Adults need at least 150 minutes of moderate-intensity aerobic activity, preferably spread throughout the week. The same benefits can be achieved with vigorous-intensity aerobic activity for at least 75 minutes per week. Adults should also engage in muscle strengthening activities of moderate or greater intensity that involve all major muscle groups at least 2 days per week. Children and adolescents need at least 60 minutes of moderate physical activity each day. A walking plan is a good way to get started.
